

PowerPlant Parks' Equipment Division announces the availability of \$1.75M of state of the art indoor equipment for medical/recreational cannabis cultivation. Proven technology for both vegging and blooming cycles available for immediate delivery. Products not readily available in the US market and imported "direct" from Canada, Peru, China and Germany; no middlemen involved; sub-current culture circulation hydro systems manufactured in the US. The turnkey systems are available in 9 plant pods as seen below.

All current inventory is being sold at 40% below consultant pricing and 100% less than hydroponic retailers. Purchasing thru PowerPlant will dramatically reduce your time to market and for home growers you can start vegging or blooming within 48 hours of your purchase. All equipment being sold has had numerous side-by-side testing done and with other leading lighting and hydro companies. Results having produced yields of up to 20% more finished product.

For those who would only like to bloom, PowerPlant can refer our customers to growers that have an assorted inventory, (of teens) of many high-yielding strains. Mature teens all certified free of any chemical compounds and with full genetic testing provided on each strain. Most are 7-10-week strains; our lighting technology have consistently taken one week off this bloom cycle.

All sales of PowerPlant equipment, (assembly available) come with a 1-year written warranty that guarantees performance as per factory specifications. Ten hours of person to person technical support is also included with your purchase of one or more complete systems. PowerPlant maintains an advisory board of industry experts & master growers available for consultation to your collective/cooperative at well below industry rates.
